PROFESSIONAL SUMMARY

Full stack software developer living in the metro area. I have a background in hospitality along with a technical mind, solving problems with creativity and ingenuity. I love to learn new things whether it be tech related or not, I constantly strive to improve myself for the better and hope to fulfill my curiosity through learning as much as I possible.

WORK HISTORY

COOK
07/2019 to 03/2020

Shore 96 | Shoreview, MN

- General line cooking duties, preparing food, consulting on specials and new menu items, and ordering food products.

FULL STACK SOFTWARE DEVELOPER STUDENT
01/2019 to 07/2019

Prime Digital Academy | Minneapolis, MN

- Solo Project : Foodaholic Purpose of my application for hungry patrons to find local food trucks with information on what they server, prices, and their location.
- Users may search on a current map displaying all trucks within their vicinity Incorporating React, Redux, Material-UI, JavaScript, PostgreSQL, Node, and React- Google-Maps library.
- Group Project: Brain Change Working with our client, Lyle Wildes, developed an application that helps capturing data used to find links on recidivism.
- Main users would be incarcerated or parolee type, identifying their core values and what might be conflicting internally with them.
